

FAQ

Welcome to a completely new way for Guitar Based Bands to Rehearse, Record and Live Stream to a Worldwide Connected Audience with Pro Level Gear and a Multi Camera Shoot, with up to 21 Cameras!

JamPadSpace Studios is very much a PROMOTION and LIVE TRACK Studio, as opposed to just being an Ordinary Recording Studio. Even though our Studio records all the Instruments, it is very much biased towards Promoting your Guitar Based Band by LIVE STREAMING your performance with a Multi Camera Video Shoot, on our unique “ONLINE INTERACTIVE GIG STAGE”!

We utilise all the Social Media Platforms to promote your Band by filming Video Interviews, taking Photographs, Producing Memes, making Gifs and producing Audio Clips for us to PROMOTE all your content across all our social media channels and in doing so, help your Band to maximise your Online presence and to elevate your Online profile to the next Level!

What Makes JamPadSpace Studios different from other Studios?

JPS Promotion Studios was created in order to Promote Guitar based Bands by using “Bleeding Edge” technology to help them promote their Band to the next level and gain greater recognition by engaging with Social Media platforms and by LIVE STREAMING their LIVE STUDIO GIG and by utilising the unique JamPadSpace “ONLINE INTERACTIVE GIG STAGE”!

We LIVE TRACK your GIG Performance using the most INNOVATIVE CUTTING EDGE Studio Technology available. We WRAP that AUDIO and VIDEO Technology around our Unique STAGE and BROADCAST your Band LIVE to a WORLD WIDE CONNECTED AUDIENCE!

We do this using our UNIQUE ONLINE INTERACTIVE GIG STAGE with all the provided Instruments FULLY connected to the ONLINE World! Everything is DI'd & MIDI'd UP and monitored with the provided personal WIRELESS IEM'S.

OUR Unique ONLINE INTERACTIVE GIG STAGE helps you produce a GREAT SOUND that is also MULTI-TRACKED simultaneously, so you get a RADIO READY Edit at the same time!

We use 21 Cameras to cover every angle possible and we switch these LIVE during your performance, whilst we STREAM your Gig LIVE to YOUTUBE (Original Music) or LOUNGES.TV (Cover Songs).

We also STREAM to TWITCH to interactive with the Online GAMING Community! After your GIG, jump onto our Sony PLAYSTATION 5 and play games with your FANS who you have just performed a LIVE GIG for on TWITCH! This is a WORLD'S FIRST! Only at JamPadSpace Promotion Studios

A recording is also available to watch at anytime!

ADD IN a FULL Lighting RIG and FX and your all SET for your ONLINE GIG!

LIVE TRACKING means your performance remains Human, Natural, Powerful, Emotional, Real, Engaging, Authentic, Entertaining, Relatable and Personal! OUR research shows that THIS is what your Audience WANTS!

Your GIG will LOOK and SOUND Great on your FANS SmartPhones and Ear Buds and they can then interact with you, by showing you their support to your MUSIC & VIBE! You can then take them with you, on your Journey to further SUCCESS!

We can help you Promote YOUR MUSIC across ALL Social Media Platforms, in order to increase your ONLINE profile and Traffic, Help you Reach Out Further to your connected FANS and for your BAND to earn an ONLINE Income, via our UNIQUE CASHBACK feature!

JAMPADSPACE PROMOTION STUDIOS delivers all this and more! NO other Studio has ever done anything like this before!

This is a WORLD'S FIRST for Musicians and Bands!

Jump into our PIPELINE and become part of our AMAZING Journey!

JamPadSpace – is Designed by Musicians for Musicians!

What is the Online Interactive Gig Stage?

It is a stage within the studio, that has all the instruments set up for DI (Direct Injection) Multi Track & MIDI recording and Live VIDEO Streaming via 21 HD cameras.

Each Instrument has its own position, which is its own workstation. Each Workstation has its own “Colour” which identifies your workstation and helps with cable management.

The Stage also has Large LCD TV Monitors that are positioned in view of the Musicians, so that they can see the feedback from the Live Streaming Audience. It also has a Full Lighting Rig and Smoke Effects too.

So what will be my Colour?

Red	Guitar 1 (Lead or Rhythm)
Green	Guitar 2 (Lead or Rhythm)
Blue	Bass Guitar
Yellow	Drums
White	Keyboards
Purple	Vocalist

Why do we need to do Online Gigs?

JPS Studios recognises that the music Industry must keep “Music Live” but this is an increasingly difficult thing to do, as bands face venue closures, difficulty in obtaining paid for gigs, difficulty in getting your audience into those venues, poor fees or even zero fees and also near zero payments from the major streaming platforms for your recorded tracks!

Touring and Merch are great ways for a band to gain an income but Touring is very expensive, and TOURS can also be Limited to far fewer Locations / Venues, that was once was once the case - only 20 years ago as so more many GRASS ROOT venues have now closed in recent times! So Bands can easily get stuck in a rut! One YOUTUBE artist recently posted that she lost £12,000 on a 13 date UK Tour! JPS studios believes that the solution to all this is to have a good blend of LIVE GIGS and ONLINE GIGS! (Our ONLINE Merch Store is Coming Soon!)

We do this by supplementing your LIVE GIGS by using ONLINE “21ST CENTURY” TECHNOLOGY to increase your online Exposure to a WORLDWIDE CONNECTED AUDIENCE!

JPS Studios offers very competitive RATES to help all guitar based bands of every level, with one such example being Time Zone Gigs, where a band has a following in another country already, but are unable to afford the touring costs associated with that International Tour. Our Time Zone CONERTS & SHOWCASE offer overnight Live Streaming from our Studios, so that your band can be Live in the evening of your connected audience, in their own city time zone, for a 9pm start in LA which is actually 4am UK time!

Can you Video our Live Gigs at a Venue?

Yes we can.. we have a package that specifically does that, where we bring the cameras to you! We offer a 4 camera shoot with two Camera Operators to record your Live Gig and two static cameras. The Gig is Video Recorded and then is edited in post production. The video will be uploaded to the JPS studios YouTube Channel or Lounges TV and a copy for the band.

What platforms are used for Live Streaming?

YouTube is our “go to” platform. Other JPS Studios Social Media channels are used to point potential online viewers to the JamPadSpace Youtube channel. All the bands that use our facilities are Live Streamed and recorded on this JPS YouTube Channel. We have also started to use LOUNGES TV as well as this is better suited for Bands who do “COVER” Songs! We use TWITCH for interacting with the ONLINE Gaming Community!

As a band, we have our own Socials... can we not use them instead?

Yes you can but whilst at the Studio, you can only use the JPS Social channels. You can provide links to your channels but the content sits on the JPS channels. This is because we are trying to build a following using Youtube that all Bands using JPS Studios will benefit from, by monetising our YouTube channel, so that we can ALL earn an online income (CashBack) by enabling AdSense, Affiliate Marketing, Sponsorship, Channel Membership and Super Chats etc! This is how we can give you CASHBACK! (Coming later this year!). Our ONLINE MERCH STORE will also be possible with this in mind.

Can you explain the Cashback?

Cashback means that any online income that is earned by the JamPadSpace Youtube channel is collected and paid back to the Bands. The split of income is 60/40 in favour of the band. Other online income such as YouTube Super chats are paid directly to the band getting those SuperChats, as a result of their Live Stream, less the same split.

What is ADSENSE & AFFILIATE Marketing? Coming in 2025!

ADSENSE is a YOUTUBE terminology where by the YOUTUBE channel is monetised, so that adverts can be placed on the Videos. This means that any income from those adverts comes back to the YOUTUBE channel. This is one of the ways we can give CASHBACK. We can place Adverts at the beginning middle of end of our Videos. Don't worry, an advert won't appear in the middle of your song!

Affiliate Marketing is where JPS Studios would sign up with a supplier of equipment, such as a music instrument warehouse company. If a Recommendation / Endorsement is made of some equipment, then if a person who has seen that video then buys an item from that company and not necessarily the item recommended, then we get a payment for the recommendation! It has no bearing with the buyer and can be a very lucrative Online income. Our Studios are full of equipment that can be used for this purpose!

QR Codes:

These codes will be displayed on screen, so that Fans can directly access the JPS website and make direct payments in order to show financial support to your band!

ONLINE MERCH Store: COMING SOON

For our bands who Subscribe. You will be to upload your Merch Designs and be able to sell CD's, Vinyl & T Shirts

So our Band can earn an online income with JPS Studios?

Yes it can! Its a world's first! We are using all the technology available to place bands in the very best position to increase their online income! By utilising the Umbrella of our Youtube Channel for all Live Streaming for Bands using JPS Studios, as there are many more advantages to working collectively, than a

band working individually. YOUTUBE is perfect for Monetisation and for gaining a subsequent ONLINE Income!

What happens to the Socials when we are not at JPS Studios?

Content that is filmed whilst you are at the studio is used to “Drip feed” our Socials over the weeks that you are not at the studio! Because you will be using our Studios on a monthly basis, this will be the best way of obtaining continued Cashback, then this promotion continues, along with any Cashback earned!

So Yes, we are still working for you whilst you are not at the studio, by promoting your content that is produced here at JamPadSpace Promotion Studios!

CASHBACK will be offered sometime in 2025, when this happens and Bands who are on the TIMEZONE & SUPPORT ACT GIG package, will then be paid CASHBACK on a 6 month rolling basis, once the JamPadSpace Youtube channel has been monetised.

If you don't book our Studio again, then the CASHBACK stops one month after your last Studio booking with JPS Studios. CASHBACK is for ONLINE GIGS ONLY and we are still working for you, whilst you are NOT at the Studio! We also offer a rolling 3 month subscription package, which is the perfect partner for our CASHBACK service as it offers our most competitive rates!

What does the Promotion consist of then?

Everything you do at JPS studios is for the benefit of your fans. In time...you want your fans to become *Superfans*, so that they are willing to spend money to support you. Just like them paying for a ticket at a gig or buying Vinyl / CD!

YouTube is the JPS Studio's “go to” platform! All other JPS Studio's Social Media platforms will point to the JPS YouTube Channel. All bands will feature their own content under the playlists section of the JPS YT channel. Fans will easily be able to see their favourite bands content! They will also be able to browse other bands content too. It must be understood that all bands under the umbrella of JPS Studio's is a collective of Bands...so it is to everyone's advantage that all bands collectively like each other online!!

Whilst at JPS Studios your band will have access to Online Selfie Cameras that can be used to go online on the likes of Instagram, Facebook, X etc to inform your fan base that you will be going Live on Youtube in a few hours time!

These cameras, along with other JPS cameras can be used to create content for later social media uploads! (ONLINE GIGS ONLY)

You will ask fans to Like, Subscribe, Hit the Bell Icon, Share the Content & Comment on your performance whilst at the Studio. Any fan responses must be responded to using the computers and mobile devices at the studio! You must respond enthusiastically to fans comments, as this is how you will encourage fans to become Superfans! Superfans don't happen overnight! They must feel part of your "Band's" Family! We have various promotions available to help them support you!

On the JPS YouTube Channel, You, your Fans, your Friends & your Family should Like, Subscribe, Hit the Bell Icon, Comment on your performance and Share the Content and you need to do the same for the other Bands within the JPS community too.

This process will increase viewing traffic on the YouTube platform, which in turn will help monetize the JPS YOUTUBE channel.

This will mean that you will obtain cashback quicker. You will also encourage your fans to become superfans, by offering exclusive content for those Fans.

There is no guaranteed time frame as to how quick Cashback can be paid but it is anticipated at 3 months after the JPS Studios YouTube Channel has become monetised that Cashback could potentially be paid. (Cashback will be offered in 2025!).

So JPS Studios is a recording Studio then?

Yes & No - they are but not in the normal sense, we do offer full MultiTrack Audio recording but the emphasis is on Video Promotion and LIVE Broadcast of your Band on a regular basis, so that your Traction is increased, your reach to your Fanbase is increased and that your CASHBACK continues to grow!

What we **DON'T** offer is the service of recording your next Album, as that's not what we are about! We believe that Promoting your SINGLES on a regular basis, is a much better way of promoting your Music, until you get noticed by one of the "Major Labels", we believe our job is done then – this then allows you to go on and make your Album with your newly signed label!

Are the JPS Studios sound proofed?

No but they are acoustically treated, as the JPS studios are near silent in operation. JPS Studios are a speaker less Studio on the sound stage.

All the instruments are DI'd & MIDI connected directly and your monitor sound is provided by wireless Headphones/IEM's.

Your headphone mix can be different to the overall Band Mix. This Band Mix is what is Broadcast to YOUTUBE / LOUNGES.

Does that mean all the instruments and gear are provided?

Yes it does, however Guitarists can bring there own guitars if they choose to do so.

Why can't I bring my own instrument?

As all instruments are pre-wired into position (Audio & Midi) and along with Preset Camera angles, therefore, it is not possible to bring your own instrument, as there is no time within the session for setting up and dismantling gear and realigning all the cameras!

What Instruments are supplied then?

Drum Kit, Keyboards, Guitars, Microphones & Stands, Sample Pad and Guitar PedalBoards.

What other Gear is supplied?

Stage, Lighting Rig, Effects, Band Logo Screen, Cameras, Relay TV Monitors, Headphones, IEM,s, Selfie Cameras, Podcast Gear, Photo Gear, AV Post Production.

As a Guitarist / Bass Player why can't I bring my own Pedalboard / Amp?

Amps are not required in the studio as it is a Silent Studio. All our BOSS pedalboards are pre-wired and connected to each guitar workstation via a laptop. This laptop is web connected (Boss Tone Studio) and also runs Apple MainStage and allows settings of the pedalboard to be saved for future visits to the Studio.

A Boss Multi Effects pedalboard (with Bluetooth) has been chosen to provide guitarists with a great tone from a great choice of built in modelling amps and also great Boss Guitar effects too!

Separate guitar pedals have also been provided for more flexibility along with a Boss Vocal Performer pedal. MAINSTAGE allows a vast array of VIRTUAL Tones and Effects to be used as well!

Can I alter the Guitar / Bass Workstation?

You can Alter and Adjust but you can't Add, Remove or Reposition anything. This includes the Mic Stand too. The pedalboard is pre wired, so as to hide the cables as much as possible and to make it look as Professional as possible. JPS Studios has gone to great lengths to make sure the `studio stage is sanitised and is as tidy as possible, as this looks so much better when filmed on Camera!

Do you have any Left Handed Studio Guitars?

Yes we do. We also have them available as half size - left and right handed! We have 16 Guitars in all!

As a Keyboard Player why can't I bring my own KeyBoards?

This is because the Keyboards are pre-wired and connected to the Keyboard workstation via a laptop. This laptop is web connected and also runs Apple MainStage and allows settings of the Keyboards to be saved for future visits to the Studio.

JPS Studios has gone to great lengths to make sure the `studio stage is sanitised and is as tidy as possible, as this looks so much better when filmed on Camera! MAINSTAGE allows a vast array of VIRTUAL Tones and Effects to be used as well!

Can I alter the Keyboard Workstation?

You can Alter and Adjust but you can't Add, Remove or Reposition anything. This includes the Mic Stand too. The keyboards have been pre wired so as to hide the cables as much as possible and to make it look as Professional as possible. JPS Studios has gone to great lengths to make sure the `studio stage is sanitised and is as tidy as possible, as this looks so much better when filmed on Camera!

As a Drummer, why can't I bring my own Drum Kit?

This is because the Drum Kit is pre-wired and connected to the Drum Kit workstation via a laptop. DI sound & MIDI is required to work with the other instruments, so an Electronic Drum kit is required.

The Drum Kit at JPS Studios is arguably the very best Electronic Drum kit available! The laptop is web connected and also runs Superior Drummer 3 and Apple MainStage Software and allows settings of the Drum Kit to be saved for future visits to the Studio.

JPS Studios has gone to great lengths to make sure the studio stage is sanitised and is as tidy as possible, as this looks so much better when filmed on Camera!

Why is the Drum Kit Electronic?

As the studio is Silent in its capability the Drum kit needed to be electronic in order for it to be DI'd & MIDI along with all the other instruments. A decision was made to make this drum kit the very best Electronic Drum Kit available and Roland Electronic VAD Drums were chosen for this reason.

It is custom designed for our Studio in order to provide all drummers with ultimate flexibility and thereby demonstrating the capability of modern Electronic Drum kits too. It is arguably the very best Electronic Drum kit available.

It can either be played simply as a One UP and one down kit or as a full Monster kit! ToonTrack's Superior Drummer 3 Virtual Studio Technology software is used to truly bring outstanding drum sounds to the Band's Mix! Drummers are able to design their own kit from the top ten list of drum manufacturer's and then save it for future use!

I've heard of Toontrack's Superior Drummer 3 but I've never used it.

Superior Drummer 3 is arguably the World's Best VST Drum Software available. It can be used by non drummers to program drums into Audio recordings and is used in many of the Top Worldwide Studios. However, it can also be used by a Live Drummer, to trigger the sounds, with used with an Electronic Drum Kit.

The Drum Kit and Cymbal Sounds within Superior Drummer 3 are Real sounds of the original Drum Kits recorded in the very best Recording Studios, by the Very Best Audio Engineers and using up to 11 of the Very Best Microphones to record the Drum Kits to the Very Highest Quality! The result is an amazing sounding Drum Kit/s from the top ten Drum Kit Manufacturers!

Is the gear easy to use?

When your band books it's first session at JPS studios you will given a FREE 4 HOUR SESSION first. This is done to allow all musicians to get familiar with all the gear at the Studio and in particular, to dial in the your instrument sounds, your Vocal Tone and also the overall Band Mix. All these settings can be saved for future Studio sessions.

The drummer will be shown how to use the Electronic Drum Kit and also the VST software, so that adjustments can be made to customise the sound of the Drum Kit. There are 10 Pre Set Drum Kit manufacturers to choose from and once selected, each one of these Kits can be tweaked to the chosen tone of the drummer. The same applies to Cymbals too. Once the Drum Kit Sound / Tone has been dialled in, it can then be saved for future JPS Studio sessions.

What Acoustic Drum Kit Manufacturer's can I choose from in the Drum Software?

DW, MAPEX, LUDWIG, YAMAHA, TAMA, PEARL, GRETSCHE, PREMIER, SONOR & ROGERS.

What Acoustic Metal Cymbal Manufacturer's can I choose from in the Drum Software?

ZILDJIAN, PAISTE, SABIAN, MEINL & ISTANBUL

Can I use my own personal Drum Sticks on the JPS Drum Kit?

YES & NO!

YES - if your sticks are new and do not have any splinters along the shaft of the stick, as as in doing so, the splinters could cause damage to the Rubber Cymbal Pads.

NO - if your sticks are worn and have splinters along the shaft. If you choose to bring your own Drum Sticks they will need to be checked first by a member of the JPS staff.

We supply a good selection of varying styles of drum sticks that are suitable for use with the Studio Electronic Drum Kit.

Can I alter the Drum Kit?

You can Alter and Adjust but you can't Add, Remove or Reposition any of the Kit. This includes the Mic stand too. The Kit is pre wired so as to hide the cables as much as possible and to make it look as Professional as possible. JPS Studios has gone to great lengths to make sure the `studio stage is sanitised and is as tidy as possible, as this looks so much better when filmed on Camera!

As a Drummer, I only play a left Handed Kit, can I alter the Studio kit?

Unfortunately NO. We can not accommodate "Lefties" at this time but we do have plans to do so in the future.

So we don't need to bring any gear then?

No you don't... everything is supplied ... so it is simply a case of "Walk in-Plug in-and Play"!

You do need to bring your supplied IEM In Ear Tips!

Guitarists can bring their own guitars if they wish!

Drummers are advised to bring their own "sweat" towel if required and are asked to wipe the kit down after use too!

If you want to take away any audio recordings made at the Studio then it is advisable to bring your own Thumb Drive Memory Stick or portable SSD Hard Drive or we can electronically transfer them.

What about other instruments?

We can't really deal with any Woodwind, Brass, Strings or Percussion instruments at this time. However, there is a Electronic Percussion Work Station available, in front of the Drum Kit, for use by any Band Member, in order to play percussion sounds or samples by using the Roland SPD SX SE

sample pad. There is also a physical tambourine available for use with any of the microphones.

The gear sounds complex to learn?

No - its quite the opposite actually.

Upon every new band who books and pays for a session, the very first session is FREE OF CHARGE up to a 4 hour maximum. This is to enable the band to obtain their sound and also their own instrument sound and monitor sound and to get familiar with all the Gear! It also gives time for the drummer to design his Drum Kit and save it. Other instrument tones and settings are saved too!

These can then be saved for the subsequent sessions. (PDF manuals are supplied on each laptop for reference). So once the sound is obtained, it will always be available for future sessions and can be tweaked or changed at any time! A member of JPS Studios staff is available at all times to assist.

How do we get our Instrument Sound?

Guitarists / Bass Players...

They can use the supplied pedalboards for their tone and chosen effects and then saved on their workstation laptop.

Keyboard Players...

They can use the Keyboards / Electric Piano sounds as normal for their sound and then saved using the supplied thumb drives for each keyboard, to be then saved on their workstation laptop.

Drummers...

They can use Superior Drummer 3 to design their kit and obtain their sound and then save it on their workstation laptop. They also have access to Sample Pad that can also be saved but also Drummers can bring in their own samples to load up on to it!

How do we get the Band Sound?

All instruments are connected to two Roland Session mixers, that are connected to each other, that allows the balance of each instrument to be obtained and the Total Mix of the Band Sound to be obtained too. Individual Monitor Mixes can also be set. All these settings can be saved for future sessions on the supplied Thumb Sticks.

These settings will be pre loaded back in prior to your next booked session!

What about the Vocals?

Vocals - each workstation has its own Vocal Effects pedal which the Mic is connected to - to obtain the Vocal sound. These pedals are web connected and settings are interchangeable with the other Vocal pedals.

This means that everyone can easily have the same vocal effect if they so wish. The Mic DRY Sound is also recorded "Pre" the vocal effects pedal.

Solo Vocalists have their own Mic on a separate Mic stand and their vocal pedal is shared with the Electro Acoustic Workstation. Other vocal effects such as Reverb, Echo, Delay, Double and Pitch Correction can be added in the Control Room.

How do we hear ourselves play?

Each workstation has its own set of IEM's, Wired Closed Back Headphones and Wireless Closed Back Headphones to choose from. Ear Cup Covers are also available at each workstation for personal hygiene, along with sanitised wipes for wiping down headphones and IEM's. Please dispose of Ear Cup Covers and wipes in the supplied bins.

Are the "In Ear Tips" supplied ?

Three different sizes of IEM "in ear tips" are supplied FREE OF CHARGE on the first use of our Studio. These need to be brought in again on future bookings. If not brought in and IEM's are required, then a £5 charge for just one size of ear tip will be made to the lead booker.

Can I bring in my own personal IEM's and tips?

Yes you can!

What about our Songs that have an Acoustic Guitar?

An Electro Acoustic Guitar and a steel guitar are supplied along with its own pedalboard. You can bring your Own Electro Acoustic Guitar if you so wish!

What Studio Guitars are available?

We have a great selection of guitars, 16 in all, that can also have a camera mounted on the end of the neck. (Guitarists can bring their own guitars if they wish to do so!)

The Studio Guitars are:

Squire Stratocaster Guitar
Squire Telecaster Guitar
Squire Electro Acoustic Guitar

Epiphone Les Paul Guitar
Epiphone SG Guitar

Customised 7 String Semi Acoustic Electric Guitar

Squire Precision Bass Guitar
Squire Jazz Bass Guitar
Harley Benton Steel Guitar

LA "Stratocaster Style" Full Size Right Handed Guitar
LA "Stratocaster Style" *Half Size* Right Handed Guitar

LA "Stratocaster Style" Full Size *Left Handed* Guitar
LA "Stratocaster Style" *Half Size Left Handed* Guitar

LA "Precision Style" Full Size Right Handed Bass Guitar
LA "Precision Style" *Half Size* Right Handed Bass Guitar

LA "Precision Style" Full Size *Left Handed* Bass Guitar
LA "Precision Style" *Half Size Left Handed* Bass Guitar

YAMAHA EZ AG Midi Guitar for beginners
YAMAHA EZ EG Midi Guitar for beginners

Are Plec's, Capo's and Spare Guitar Strings supplied for the Studio Guitars?

Yes they are.

Why are Laptops supplied on each instrument Workstation.

Each workstation has it's own laptop, so that settings can be saved and in the case of Guitars, new tones and patches can also be download for further use. Apple MainStage is also available on each laptop and each laptop has its own audio interface to accommodate that.

Do you have Guitar Tuners available?

Yes. All pedalboards have them built into the Main pedal.

Do you use wireless connections for the guitars?

Yes we do. Wireless is used on all Mics and Guitars & Bass and also on the headphones /IEM's. Wireless IEM's are for guitarists and Vocalist only. This means that the front facing performers are free of cables to move around freely. Drums and Keyboards are all wired.

How many Cameras are used for Live Streaming?

A maximum of 21 cameras are used on our “Online Interactive Gig Stage” Studio. There are a further 30 cameras throughout the studio, that used for other Promotional purposes.

That's a lot of editing Time in Post then?

During the Live Stream / Recording of the Online Gig, we switch the Cameras in Real Time during the performance of the Live Stream Broadcast. So once this has ended, all the edits are done!

If any edits need correcting then this file can easily be upload to our AV editing suite for any quick alterations. This whole process speeds up the production time and minimises the post production video editing time immensely.

How long is a Studio session at JPS Studios?

It varies depending on how long you book for! Please note that there is a minimum of 4 hours on all Studio packages.

How much is a session?

See our RATES for all our prices

Is there a member of JPS Studios staff in attendance?

Yes, at all times a member of JPS Studios is in attendance and their typical role/s would be:

Studio Manager, Photographer, Videographer, PodCast Creator, Content Creator, AV Engineer, Video Camera Operator, Live Broadcast Engineer, Video Editor, Instrument Tech, Sound Engineer, & IT support! Our Staff are Multi Skilled to say the least!

What Post Production Facilities are available?

Apple Mac Mini UltraWide Monitor AV editing suite is available for both DAW (Logic Pro X & GarageBand) editing and Recording with 88 Key Midi keyboard and a remote control surface.

Video Editing is with Davinci Resolve Studio with a speed editor control surface.

3 sets of Studio Monitor Speakers and 6 Studio quality Beyer DT770 Pro Headphones.

Adobe Photoshop & Lightroom is used for Photos.

We also have Steven Slate VSX Audio Headphones for virtual Mastering with world famous studio Plug In's! It's just like sitting on one of those studios, behind their desk, whilst you listen to your own mix!!

Is the Post Production Suite available separately?

Yes it is!

Do you provide an Audio Engineer?

No we Don't! In order to keep our prices competitive we supply our post production facilities on a DRY Hire basis - DIY so to speak!!

JamPadSpace Promotion Studios is DRY Hire. Which means there is No Audio Engineer included. However, there is always a JamPadSpace AV Technician available. The very nature of the studio is to have a greater emphasis on the imagery such as Photos and Videos's, so our AV technician is a Camera operator, Video Editor and IT technician - all rolled into one! Our AV Technician is also a Sound Engineer, which is different from an Audio Engineer in that that there expertise lies in LIVE Sound, as opposed to recorded Sound. JamPadSpace Promotion Studios is all about Promotion and once your LIVE sound is SET and SAVED to our computers for future use, then the PROMOTION starts and that's were our Photography and Video skills take over! Of course, you can do it yourself or bring your own engineer!

Are the recordings at JPS Studios Dry or Wet?

Both Dry and Wet are recorded for all instruments along with Midi.

The Wet sound is broadcast on Youtube and a separate DRY recording is also made as a Multi Track recording of all Tracks including the Mic's along with a Midi recording. This means that alterations, tone & effects can be applied in post!

Are Podcasts available?

YES ... but we go one better with doing LIVE & RECORDED multi Camera Video Interviews, which are very similar!

Is a Photo Studio available for Promo Photos?

Yes...a photographic set is available for headshots etc

Why are Video Radio Mics worn?

These are used to obtain better quality Audio for our Video productions, Interviews, Memes, Gif's and Audio Clips etc

Are JPS Studio staff DBS Checked?

Yes they are.

What Clothing shall we wear considering we are Broadcasting on a Live Stream to the World!?

Feel free to wear whatever your image requires. We only ask that what you wear complies with our policy on decency and please don't wear clothing with any LOGO's on (for copyright reasons).

Why Gaming?

The Gaming Market is worth 4x the whole of TV, Film & Music Industries all put together! It's worth a whopping £200 Billion a year! Gamers are Music Fans! They listen to more streamed music than non gamers, as they are more invested in their chosen music / bands!

JamPadSpace Studios have developed a Strategy to enable musicians / Bands to “Tap Into” this lucrative Gaming Market! In addition to utilising YouTube and Lounges.TV for streaming, we also utilise “TWITCH” and “DISCORD” to appeal to the Gaming Community, via use of our Unique Online Interactive Gig Stage!

You can even interact with this Gaming Audience via playing games with this audience via our Studio Games Console. This regular interaction should enable regular monetization of this fanbase and thereby increase you profile and Promotion, along with a greater Cashback opportunity.

This Gaming Market can't be ignored and here at JamPadSpace Studios we believe that “Gaming and LIVE Streamed Music Performances are going to be the next BIG THING in the Music Industry - so don't “LEAN BACK - LEAN IN” to this new and exciting opportunity - only available at JamPadSpace Promotion Studios!!

Why Do you offer Subscriptions?

In order to provide the most competitive pricing, particularly for GEN Z, we now offer Subscription Pricing in order to maintain those low prices, so that we don't exclude GEN Z from using the most Advanced Promotion Studio available!

In the case of GEN Z we want to maintain a competitive price for these Bands, as JPS supports our up and coming new GEN Z Bands by not pricing them out of this fantastic opportunity to Broadcast Live to their online Connected Fans!!!
